Accenture Introduces New Capabilities at its Life and Annuity Client Conference that Support Digital Transformation and New Sources of Growth

Accenture's Life and Annuity Software practice welcomes leading carriers to its client advisory board and client conference.

June 12, 2019 – Accenture today welcomed an exclusive client gathering of senior executives and managers from North America's most recognized life and annuity brands to unveil advancements to the Accenture Life Insurance & Annuity Platform (ALIP) and strategic alliances that will help attendees unlock sources of sustained growth and innovation amidst industry disruption.

Shay Alon, a managing director at Accenture who leads its Life and Annuity Software practice, highlighted several innovations and investment areas that go beyond digital transformation to a new paradigm that offers even greater opportunity enabled by digital technologies, partnerships and a flexible platform that efficiently brings them together. He discussed ALIP's foray into the health and wellness space as part of its expanded insurance ecosystem, and advancements in ALIP's cloud strategy as well as its recently launched Accenture Life & Annuity Analytics solution.

"Every carrier is undergoing unprecedented disruption, and we see tremendous opportunity to lead a path forward," said Shay. "We're excited to collaborate with some of the best and brightest minds in the insurance industry to enable them with the technology and business functionality they need to create profitable, sustainable growth."

Accenture is joined by several technology alliance partners and conference sponsors—RGA AURA, Microsoft Azure, Qlik, SS&C/AWD — for the week's events held in Clearwater Beach, Fla. June 10-14.

Used by leading insurers worldwide, ALIP is a robust, configurable and scalable solution that provides life insurance carriers and annuity providers with advanced capabilities for product development, new-business development, underwriting, policy administration, claims and payout. It is available as an on-premise solution and over the cloud as an integrated suite of software with modules that can be implemented individually or as part of a broader migration strategy.

Accenture's life and annuity software is part of Accenture Life Insurance Services. By applying extensive industry knowledge to continuously enhance its software, Accenture helps insurers reduce operating costs, manage risk and drive growth through improved product development and distribution, enhanced policy administration and distribution, and technology platform consolidation and modernization.
